NLCI Kannada - Frequently Asked Questions

How do I use the halant character as a vowel?

The fonts have a blank and zero width glyph for U+25CC DOTTED CIRCLE. This allows the character sequence of

- U+0CCD KANNADA SIGN VIRAMA
- U+0CD5 KANNADA LENGTH MARK

to display as desired for some languages. A better solution, which also works with these fonts, is to use the character sequence

- U+0CD5 KANNADA LENGTH MARK
- U+0CCD KANNADA SIGN VIRAMA

which works for a number of others fonts as well.
